## E3 broadcasting

The UK's First Independent Internet Television Channel

*completely free to view!*

- We are Television & New Media Broadcasting. **Television From The People, For The People, By The People.**
- We operate as both a **Television Production Company**, making our own in-house shows & also as a **Television Broadcasting Company** by broadcasting these shows over Broadband Internet to a **Global Online Community** of viewers.
- We challenge traditional broadcasting by enabling people without a voice to have one. We intend to achieve this by providing a platform (broadcasting to a **GLOBAL** audience) for those who currently feel that existing television is "made by the great & good" only. Although we are not Celebrity-centric, our programming is a mix of Today's Icons with Today's People. - We are about "**Reality, ethnicity and communication**".
- We continue to seek partnerships with communities interested in developing these aims with us to build a global voice for those sections of society who currently feel that having a vote is not representative of their positions in today's society.

### New Audiences – New Shows – New Media

**DTZ.TV** is an exciting new media company specialising in broadcasting creative, cutting edge entertainment programmes for today's diverse and multifaceted cultures. The programmes that have been developed are well suited for adventures in today's new media and video enabled technologies.

*The Gherkin Files – regular Arts show on DTZ.TV*

#### IMAGE

**DTZ.TV** has evolved from an alternative network of innovative artistic and technical talents. Each one being highly regarded in their respective professional careers; each equally driven to create entertaining and informative targeted “shows” using

today's emerging and exciting technologies. The company's image and web presence is entertaining and edgy if somewhat anarchic and subversive at it's roots.

#### NEW MEDIA – NEW FORMATS

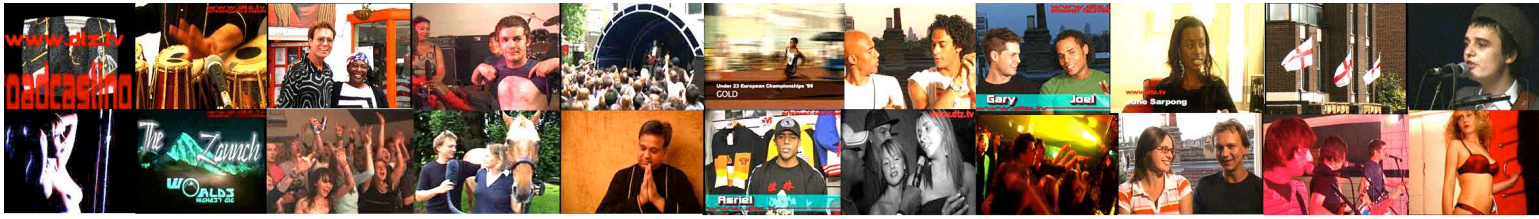

Our objective is to explore and develop content that is original, exciting and off-the-wall. **DTZ.TV** is looking to establish relationships with developers of new media delivery systems and convergence products spanning the Internet, mobile and 3G applications as well as traditional digital and terrestrial broadcasting.

#### PRESENT AND FUTURE DEVELOPMENT

The **DTZ.TV** approach to both the technical and artistic nature of production ensures that “televisual” content is produced for a multitude of today's video enabled, cross-platform devices. This enables a single media stream to integrate seamlessly with both existing and emerging multimedia platforms
